

Middleburg Elementary School 5th Graders Learn about Water Quality, Aquatics

The Snyder County Conservation District (SCCD) was invited to Mrs. Tanna Stanger's fifth grade class in the Middleburg Elementary School on March 27, 2015, to teach them water quality issues and aquatics.

Jason Winey, SCCD Watershed Specialist, first gave a presentation to the class. Afterwards, the class played bingo using pictures from the presentation.

Over the years, we have given presentations and demonstrations to school students of various ages, 4-Hers, boy scouts and Young Farmers, other civic groups and the general public in Snyder County. Topics ranged from water quality, soil erosion prevention, watershed protection, water conservation, nutrient and manure management and energy conservation.

If your school or organization would like the Conservation District to give a presentation, please contact the [Conservation District](#) at 570-837-3000.
