### Section of North Branch Mahantango Creek Repaired

Volunteers and staff members from several agencies and organizations worked on a stream bank stabilization project along the North Branch Mahantango Creek in Mt. Pleasant Mills, PA. The work took place from June 29 to July 2, 2009.

The North Central PA Conservancy received a Growing Greener grant from the PA Department of Environmental Protection (DEP). The Conservancy worked with the PA Fish & Boat Commission and the conservation districts to make sure that this and other projects were completed.

Above, four men carry a log that will be placed according to specification from the PA Fish & Boat Commission (PAFBC). From left to right (Tyler Neimond, PAFBC Habitat Manager; Jason Winey, SCCD Watershed Specialist; Brent Leach, Juniata CCD Watershed Specialist and Ben Bailey, Susquehanna University Student & Volunteer.

The project's goal is to enhance fish habitat and provide streambank erosion protection. Logs and other materials were purchased or donated from the local area. This particular project was located on a segment of the North Branch Mahantango Creek that flowed behind the Fremont Fire Company's baseball field's outfield fence.

Contact [Jason Winey](#), SCCD Watershed Specialist, 570-837-3000, x112, for project details.
